Good Morning & Welcome to Monday's trading session at Dalal Street, dated July 17th 2023.

In Friday's trade, Nifty sizzled and most importantly, did not fizzle as bullish momentum rocketed Nifty towards its new-all-time-high at 19595.35 mark.

Congratulations India! Congratulations Investors! Congratulations Aggressive Bullish Traders on the benchmark Nifty scaling a fresh all-time high at 19595.35 mark, and most importantly, enriching the wealthy investors as well as inspiring aggressive bullish traders.

The positive takeaway was that the fear gauge was simply seen tumbling.

India VIX and the US CBOE Volatility Index are down to 10.68 & 13.34 respectively. Please note, the volatility indices are now at its lowest close since February 2020, just a month before the WHO declared the novel coronavirus...a pandemic.

Now, before we get into detail, here is the preferred trade on Nifty and Bank Nifty:

Nifty (19565): Buy at CMP. Stop at 19387. Targets 19607/19701. Aggressive targets at 20000.

Bank Nifty (44819): Buy at CMP. Stop at 44175. Targets 45000/45656. Aggressive targets at 46000-46250 zone.

Outlook for Monday: Metals & IT stocks likely to do well.

Our call of the day suggests Nifty will continue to rocket upward to the moon with the theme revolving round new record-high with aggressive inter-month targets at 20000 mark.

So, simply expect the joyful and triumphant mood to prevail as optimism will continue to fly high like a kite, and the positive takeaway is that the unstoppable rally shall rocket Nifty into the uncharted territory.

We suspect, more IT and Metal stocks will aim to get on board into the spacecraft as the recent bullish momentum shall take stocks like Hindalco, Tata Steel, LTTS, NALCO, TECH MAHINDRA and JINDAL STEEL & POWER into the new orbit.

The positive catalyst: Liquidity, liquidity and liquidity.

The big investors – the FIIs camp bought to the tune of Rs 5,418 crores in last week's trade. In the month of July, FIIs bought worth Rs. 14,583 crores.

Interestingly, FII investment on Dalal Street has crossed the \$10 billion mark in FY24 on backdrop of robust GST collections, India's GDP growth rate rising to 6.1% in January-March and hopes that the monsoon is likely to be normal this year.

We expect, FIIs to continue investing on backdrop of:

The annual consumer inflation rate in the US slowed to 3% in June, the lowest since March of 2021.

Amidst this cooling inflation backdrop, investors reinforced the view that the Federal Reserve may stop the tightening campaign sooner than expected. Strictly speaking, the Federal Reserve seen successful in engineering a "soft landing" for the U.S. economy.

Meanwhile, Copper prices are buoyed by the prospect of more stimulus measures in major importer China. Copper hit a three-week high as the soft U.S. inflation data spurred bets that global economic growth will not worsen as much as initially thought this year.

Bottom-line: Indeed, the all-time-highs on our benchmark indices are back in play with sharp V—shape panic buying.

Dividend Yield	3.61%

The positive catalyst in favour of GAIL in FY 24 is expected earnings recovery across business segments on backdrop of stabilising global LNG supplies and prices.

Technically, brace yourselves for a major breakout play from a probable classic 'flag pattern' breakout on the weekly. An impulse uptrend is seen forming on the daily time scale, with positive SAR series, with recent sequence of higher high/low intact on the daily time frame.

Add to that a bullish divergence and a rising stochastic signal (on weekly charts) with recent increase in volumes signaling a larger rebound. The 200 days Exponential Moving Average (EMA) of the stock on the daily chart is currently at 102 zone. The level of Rs 100-105 zone will act as a strong support zone.

Look to buy at CMP, and on any corrective dips between 100-102.50 zone, targeting 121/130 zone and then aggressive bigger 15-18 months targets at 175 mark. Stop at 93.

GLOBAL STOCK MARKETS:

Stocks

In Friday's trade at Wall Street, US stocks made modest moves Friday as the street weighed the start of second-quarter earnings season.

Optimism prevailed as both the headline and core inflation fell more than expected in June, reinforcing the view the Federal Reserve may stop the tightening campaign sooner than expected.

Traders are currently pricing in a 92% chance for a 25bps increase in the fed funds rate this month, while the odds for another quarter-point hike in September fell to 13% from 20% before the CPI release and in November eased to 26% from 34%.

Meanwhile, Higher-than-expected profits for JPMorgan Chase and Wells Fargo failed to catapult the financial stocks higher, though the same can't be said for insurance giant UnitedHealth Group which rallied hard in the wake of its results.

The Dow Jones finished up 0.3% at 34,509, the broader **S&P 500** (-0.1% at 4,505) and the tech-heavy **Nasdaq Composite** (-0.2% at 14,113) suffered modest losses. Still, all three benchmarks closed higher on the week.

RECAP OF PREVIOUS DAY'S TRADING SESSION:

Nifty moves upward to the moon like a rocket – Scales new record-high @ 19595.35. Nifty IT index rockets 4.38% as US Treasury yields plummet.

NIFTY (+151, 19565) Sensex (+581, 66140)

Congratulations India!

1) India Celebrates Successful Launch of Chandrayaan-3.

Congratulations India! Congratulations Investors!!

- 1) On Sensex scaling fresh all-time-high at 66159.79.
- 2) On Nifty scaling new all-time-high at 19595.35.

The biggest positive catalyst continues to be softer inflation readings in the US where expectations have risen that Fed will pause its rate hikes sooner than later.

All the sectoral indices ended in green with maximum gains seen in IT and Media stocks. IT stocks rose as overnight US treasury yields plummeted.

Long story short: The bulls are here to stay even more.

As per the tool, the trader should take BUY position just above PP and keep the stop loss of PP and the first target would be R1. If R1 is crossed then R2 becomes the next target with the stop loss at R1.

Similarly if price goes below PP the trader should SELL and keep the PP as Stop loss and the first target would be S1.
